Connect and power–up

Power

The Shinobi II has a single battery slot. To connect a compatible battery, place the battery in front of the retaining lug, align with the connectors and slide the battery into the lock position.

❗ We recommend using Atomos NP–F series batteries.

The Shinobi II can also be powered via the USB–C PD port via a USB PD power adapter or power bank. It operates at less than 10W during regular use, so please ensure that your USB PD power source can supply at least 10W of power.

Locking cable adaptor

The removable HDMI + USB–C Locking cable adaptor is intended for use with our wide range of locking cables, and is attached via two Philips–head screws.

Once screwed–in, and with your cables securely locked in, you’ll have total piece of mind that they’ll stay in place for the rest of your shoot.

连接和供电

供电

Shinobi II 具有一个电池插槽。如使用兼容的电池，将电池放置在插槽中对齐滑槽并向下将电池推动到锁定位置。

❗ 我们推荐使用Atomos 的NP–F系列电池。

Shinobi II 也可以使用USB–C PD接口进行供电，支持USB PD电源适配器和移动电源。通常Shinobi II的功耗低于10W，请确保您的USB PD电源/移动电源支持最少10W的功率输出。

锁定线缆适配器

可移除的HDMI和USB–C锁定线缆适配器是与Atomos原厂发售的锁定线缆搭配使用的。适配器通过两颗十字螺丝来与主机固定。

与主机固定好以后，便可以使用锁定线缆来确保在拍摄的时候不必担心线缆松动造成影响。
